

Q.0 The average of 5 consecutive even no is 62. What is the product of smallest & largest no?

1. Average of 9 consecutive positive integer is 63. The product of largest and smallest integer is?

- (a) 8935 (b) 3953
(c) 3853 (d) 3845

2. Average of 4 consecutive even No's P, Q, R, S (increasing order) is 51. What is product of P and S?

- (a) 2592 (b) 2594
(c) 5293 (d) 2596

3. The average of 37 consecutive No is 54. The largest of these number is?

- (a) 72 (b) 70
(c) 74 (d) 76

4. Average of 41 consecutive odd No. is 49. Which of the following is the largest?

- (a) 87 (b) 85
(c) 83 (d) 89

5. Average of 44 consecutive odd No. is 144. What is the largest?

- (a) 189 (b) 185
(c) 187 (d) 188

6. Average of 14 consecutive even No's is 107. Then which of the following is the smallest Number?

- (a) 92 (b) 90
(c) 94 (d) 96

7. Average of 38 consecutive even No's is 167. Find the sum of smallest and largest Numbers?

- (a) 167 (b) 334
(c) 332 (d) 336

8. Average of 29 consecutive even No. is 446. Find the difference between first and last Number?

- (a) 56 (b) 58
(c) 60 (d) 54

Q1. A student was asked to find the arithmetic mean of the following 12 numbers. 3, 11, 7, 9, 15, 13, 8, 19, 17, 21, 14 and x. He found the mean to be 12. The value of x will be

- a. 3 b. 7 c. 17 d. 31

Q2. The mean weight per student in a group of 7 students is 55 kg. The individual weight of 6 of them (in kg) are 52, 54, 55, 53, 56 and 54. Find the weight of the seventh student.

TITA **answer: 61**

Q3. A score 73, 76, 20, 7 runs in the four innings. What Should be his score in the fifth innings, if he has to make an average of 55 runs in the five innings?

- a. 93 b. 91 c. 99 d. 55

4 Q. If the average of 20 observations $x_1, x_2, \dots, x_{20}$ is y , then the average age of $x_1 - 101, x_2 - 101, x_3 - 101, \dots, x_{20} - 101$ is TCS NQT

- y - 20 b. y - 101 c. 20y
d. 101

1 Find the average of :

70 67 65 73 75 71 83

2 The weight of 7 students of a class is 48 , 52 ,40 , 60 , 53 , 54, 49 kg respectively . Find the average weight of these students ?
A. 50
B. 60
C. 55
D. 50.875

3 **Pre-assessment :**
Q. The average Income of 40 persons is ₹4200 and that of another 35 persons is ₹4000. Then average Income of the whole group is.

4 Set A contains seven numbers, and the average of these numbers is 41. Set B contains five numbers, and the average of these numbers is 44. Find the overall average of both the sets.

TITA

5 **Q2. The average of 30 results is 20 and the average of other 20 results is 30. What is the average of all the results?**

TITA

6 **Q3. If the average weight of 6 students is 50kg that of 2 students is 51kg and that of other 2 students is 55kg then the average weight of all students is**

TITA

7 The average of n numbers is 36. If each of 75% of the numbers is increased by 6 and each of the remaining numbers is decreased by 9, then the new average of the numbers is:

8 The average of n numbers is 42. If 75% of the numbers are increased by 4 each and the remaining numbers are decreased by 8 each, then what is the average of the numbers, so obtained?

9 Average of n numbers is 58. if each of 65% number is increased by 9 and each of remaining is decreased by 11. find the New average

Type : Miscalculated

1 **Q: The average of 20 numbers is calculated as 35. It is discovered later on that while calculating the average, one number, namely 85, was misread as 45. The correct average is.**

2 The average height of 35 models in a modeling competition was calculated as 160 cm. It was later found that the height of one of the models in the competition was written as 144 cm, whereas his actual height was 104 cm. What is the actual average height of the models in the competition? **TCS NQT 2021**

a. 158.86 cm b. 157.54 cm c. 160.74 cm d. 159.56 cm

3 Average of 50 numbers was calculated as 20 when three numbers 26, 36 and 64 were wrongly read as 31, 46 and 59 respectively. What is the correct average?

4 In the calculation mohit found that the average of 10 numbers is 45 but on rechecking it is noticed that some numbers 18 ,34, 63 is wrongly taken as 81 , 43 and 36 . Find the correct average ?

5 **Q. Average age of a group of 24 students is 32 years. When age of teacher is also included then average age is increased by 0.8 years. Calculate the age of teacher.**

6 **Q. The mean weight of 34 students of a school is 42 kg. If the weight of the teacher be included, the mean rises by 400grams. Find the weight of teacher?**

7 24 students collected money for donation. The average contribution was Rs. 50. Later on, their teacher also contributed some money. Now the average contribution is Rs. 56. The teacher's contribution is:

8 The average weight of 12 articles is 18 kg. Addition of another new article reduces the average weight by 500g. what is the weight of the new article?
